Quest Psychological Consulting offers therapeutic services for children with mild to moderate behavioral, emotional, and/or social difficulties. Children that attend Quest often have diagnoses of ADHD, learning disabilities, Autism Spectrum Disorder, anxiety, depression, and/or adjustment disorders. Quest operates under the direction of Jodie Knott, Ph.D., licensed clinical psychologist (CA license # PSY20647).

For Quest's Summer Intensive Program:

Quest provides an **intensive, structured outpatient program** with a **comprehensive therapeutic system** that includes a **treatment plan individualized for each child with identified treatment goals, a behavioral milieu, group therapy provided five days per week and weekly parenting groups.** Quest has been found to **significantly decrease hyperactivity, impulsivity, aggression, and inattention, while improving peer relations, family relations, athletic competency, behavioral control, self-esteem, social awareness, social cognition, social communication and social problems.** *Insurance companies often authorize Quest services by authorizing 5 hours of group therapy per week at the rate of \$237 per session under billing code 90853.*

For Quest's School Year Groups:

Quest offers 10 weeks of **group therapy** including a **treatment plan individualized for each child with identified treatment goals.** *Insurance companies often authorize Quest services by authorizing 10 hours of group therapy at the rate of \$95 per session under billing code 90853.*
